Re: Mono Manufacturing Company

Dear Paul,

It is the City's understanding that your company has been retained by the above referenced for consultation in regard to disposal of process wastes. It is further our understanding that you have conferred with the Missouri Department of Natural Resources in this regard and that as a result of that conference in part, you wish to ascertain whether or not the waste material would be acceptable for disposal in the municipal system.

The City's staff will be happy to meet with you and/or representatives of the company at any time to discuss disposal. It would be necessary that we have an opportunity to examine the waste prior to a determination of its acceptability being made.

If we can be of further assistance or can answer any questions, please do not hesitate to call on us.

Yours truly,

Charles H. Criswell
Associate Environmental Engineer
Chief, Water Pollution Control
